

YOU NEED IT,
WE EXTRUDE IT

DESIGNING AND MANUFACTURING

of technical profiles

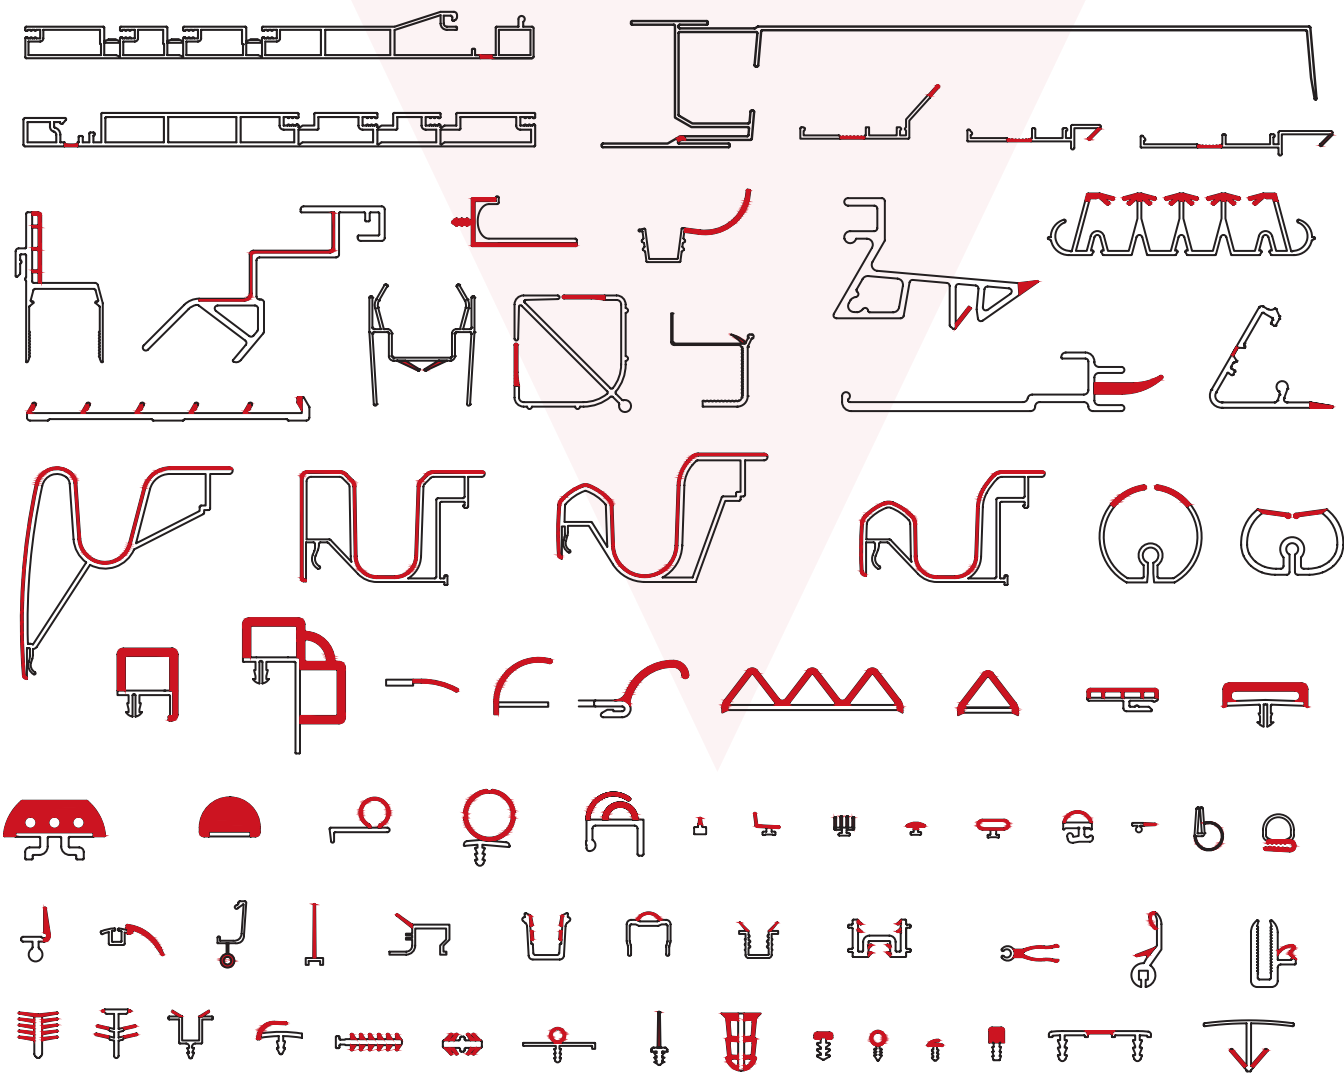

Covre Manifatture offers a wide variety of standard profiles for **different branches** (furniture industry, gaskets, glazing beads, lighting, etc.) and, thanks to our more than **30 years of experience**, the constant technological improvement of machinery and materials, the **fundamental attention to quality**, is able to follow the customer through all phases **from the design to the realization of the required article**.

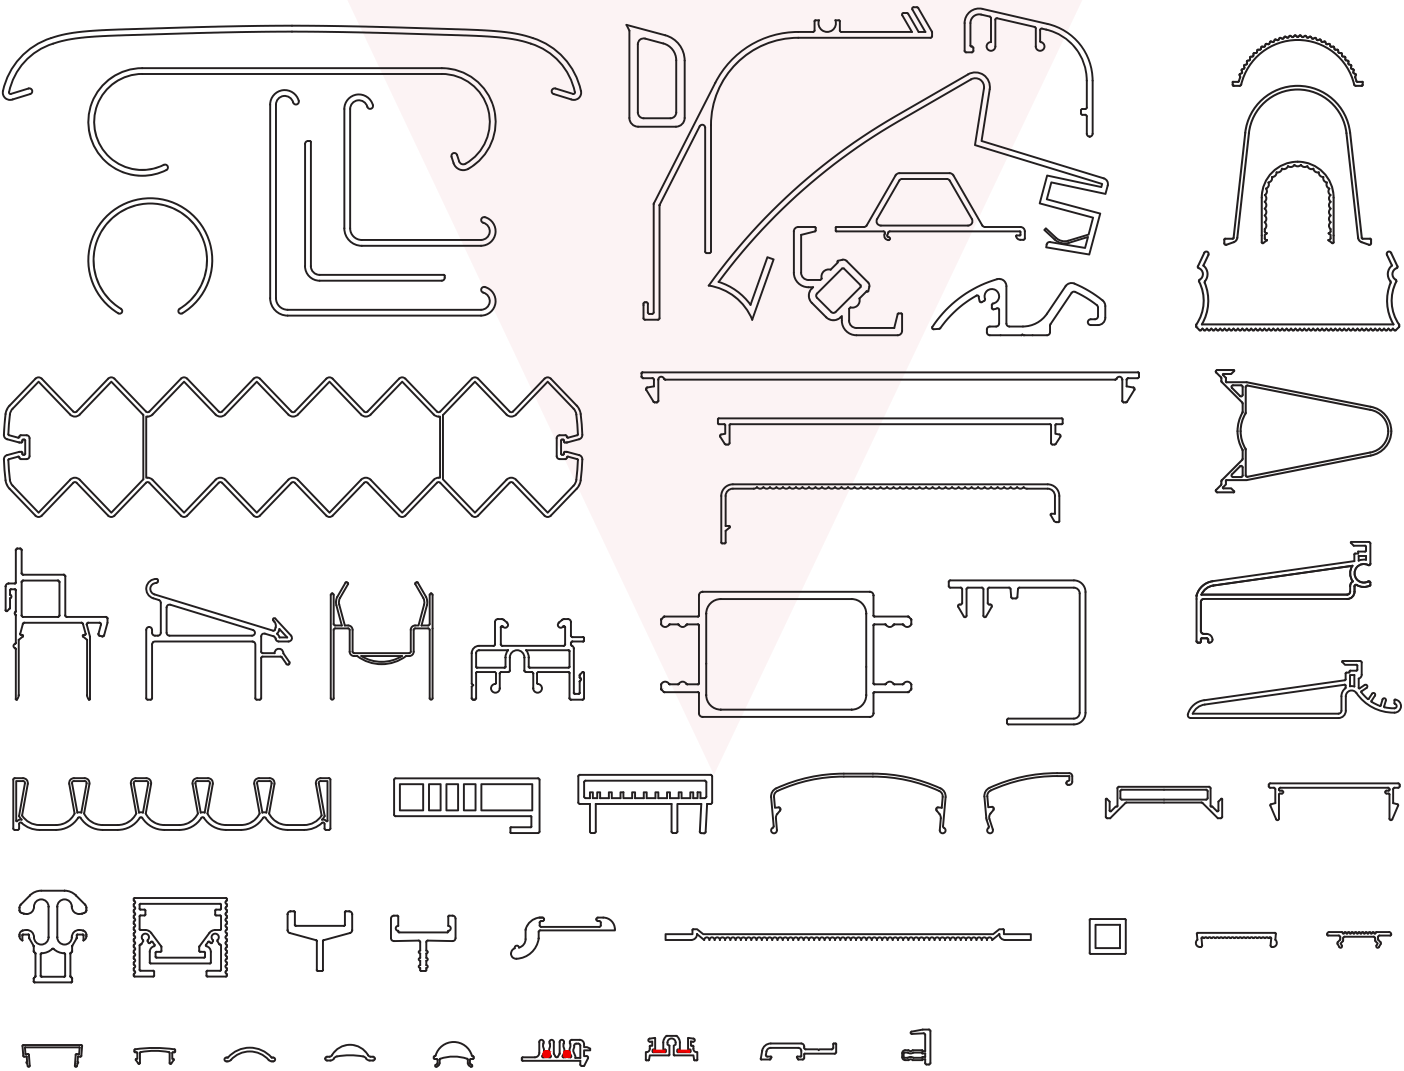

Covre Manifatture provides the customer with a **study and design service for technical profiles**, recommending the most suitable sections and materials for the required application. **We produce injection moulds, extrusion tools and calibration systems** thanks to an in-house tooling department equipped with wire and die-sinking EDM machines, mills, lathes and CNC machining centres.

It performs extrusion, co-extrusion or moulding of the required article with the possibility of post-production processes such as: cut-to-size and special cuts, drilling and milling, packaging, 'kit' preparation, chrome, plating and painting.
